

GRAND DIAMONDS®

Ring Sizer Tool

While using this ring sizer tool will never be as ideal or accurate as visiting us in store to obtain your size, this tool will help you get the closest possible idea of what your ring size is.

Before you get started: Make sure that your printer is set up correctly. Under print settings, make sure your **paper size is A4** and that you have selected **"Actual Size"**. To be sure that you have printed the ring sizer tool correctly, use a ruler to measure the guide below. If your measurements match up, you're ready to start!

STEP 1: Place a piece of sellotape over the boxed area below **before cutting out the ring sizing tool**.

STEP 2: Cut along the edges of the ring sizing tool, be sure to cut a slit in the top to loop the paper into a ring around your finger.

STEP 3: Place the ring sizing tool **around the knuckle of the finger** you would like to size. Make sure that the sizer tool can move up and down your finger.
